

Increased Ambition to Deliver Climate Action

Through our Hilton Foods Sustainable Protein Plan, under our planet pillar, we are committed to achieving our existing Science Based Targets and publish updated ambitions.

These existing targets include achieving Net Zero by 2050, across scopes 1,2 and 3.

We have increased our ambition in line with a commitment to keeping global temperature increases below 1.5 degrees.

Our updated targets to be achieved by 2030 against a baseline of 2020 are:

- 95% reduction in our combined Scope 1 and 2 emissions across our sites
- 45% reduction in Scope 3 emissions from forestry, land and agriculture in our supply chain
- 45% reduction in relevant Scope 3 emissions from energy and industrial processes in our supply chain against a 2020 baseline.

We have submitted these more ambitious targets to the Science Based Target Initiative.

Further details of these targets, and our plans to deliver them, will be released in the coming months following verification by the Science Based Targets Initiative.
